COLOMBANI (G.) Il tutto ristretto in poco, ò sia il tesoro aperto dove ogu' uno può arricchirsi di virtù, salute e ricchezza, diviso in tre libri. Nel primo libro haverà molto contento il lettore di vedere la baggia mascherata su la piazza universal del mondo, che incontrandosi nella verità, formano un virtuoso litigio, e curioso contrasto, degno d' esser letto; una più proficua a custodirlo nel cuore. Nel secondo si vede l' organizzato microcosmo sì dell' huomo, che della donna, con tutto ciò, ch' epilogo il grand' artefice in quel picol mondo con la veduta dell' infante nell' utero materno, ed il modo della sua generazione. Nel terzo si vede una faragine di cose virtuose, che toccano quasi l' universal di tutte quelle cose, ch' appartengono à chi fa la professione di giovar à se stesso, ed ad altri con l' arte medica. A new theory of consumptions, more especially of a phthisis, or consumption of the lungs; wherein, after a brief history of the distemper, its various symptoms throughout its several degrees, and every minute step it takes, from its first invading the patient, to its final termination, enquiry is made concerning the prime, essential, and hitherto accounted inexplicable cause of that disease, so very endemic to this nation, and generally fatal to those it seizes on; with an account of the great number of medicines and various methods of cure recommended for consumptions, and the different opinions of authors concerning them; also the possibility of healing ulcers in the lungs asserted, the strongest objections against it answered, and a different and more probable method of cure advanced than commonly practised; likewise directions about eating, drinking, sleeping, exercise, and way of living in general proper for consumptive persons. xii, 186 pp., 1 l. 8°. *London*, R. Reading, J. Newberry & C. Micklethwait [and others], 1742.

An essay on electricity; being an enquiry into the nature, cause, and properties thereof, on the principles of Sir Isaac Newton's theory of vibrating motion, light, and fire, and the various phenomena of forty-two capital experiments; with some observations relative to the uses that may be made of this wonderful power of nature. 40 pp. 8°. *Bath, Leake & Freerick, 1746.* [P., v. 176.]

An essay on visual glasses (vulgarily called spectacles); wherein it is shewn, from the principles of optics and the nature of the eye, that the common structure of those glasses is contrary to the rules of art, to the nature of things, etc., and very prejudicial to the eyes. The nature of vision in the eye explained and glasses of a new construction proposed. 3. ed. 32 pp., 1 pl. 8°. *London, 1758.* [P., v. 1826.]

Optical essays, containing: I. A practical description of the several sorts of single, solar, and compound microscopes, with their apparatus and latest improvements. II. The nature of vision in insects demonstrated by microscopic observations. III. A catalogue of all the principal microscopic objects. IV. CULPEPER (N.) The English physician enlarged, with three hundred sixty and nine medicines made of English herbs that were not in any impression until this; the epistle will inform you how to know this impression from any other. Being an astrologo-physical discourse of the vulgar herbs of this nation; containing a compleat method of physick, whereby a man may preserve his body in health, or cure himself, being sick, for three pence charge, with such things only as grow in England, they being most fit for English bodies. Herein is also shewed these seven things, viz: 1. The way of making plaisters, ointments, oyls, pultisses, syrups, decoctions, juleps, or waters of all sorts of physical herbs, that you may have them ready for your use at all times of the year. 2. What planet governeth every herb or tree (used in physick) that groweth in England. 3. The time of gathering all herbs, both vulgarly and astrologically. 4. The way of drying and keeping the herbs all the year. 5. The way of keeping their juices ready for use at all times. 6. The way of making and keeping all kind of useful compounds made of herbs. 7. Opened in February, and incorporated June 2, 1873, under the title: State Hospital for Women and Children, at Philadelphia. Reports for the years 1875-6 and 1878-9 were not printed. As the State never gave any assistance to the charity, the governors decided to change the name to one that would give a better idea of its objects, and accordingly adopted the present title in 1882.
